Skills

Product Development

Ruby on Rails, Heroku, git, Github, Bootstrap, Figma,
Xcode, WordPress, Chrome Extensions

Frontend

HTML, CSS/SCSS, JavaScript ES6, Stimulus

Backend

Ruby, SQL, Postgres DB, Objective-C

Work Experience

Fullstack Developer, Freelance

2021 – present | Japan

- Created web-apps based on passion projects as well as taking on freelance work.

iOS Developer

2018 – 2020 | Japan

- Built and published minimal yet useful iPhone apps on the AppStore such as ToDo List and Amazing Japan Facts.

English Language Teacher

2010 – 2022 | Japan

- Managed many classes at junior high schools around Japan as an Assistant Language Teacher.

About Me

I am a fullstack developer because I enjoy completing logical backend tasks as much as I do perfecting frontend design. My favorite Ruby on Rails gems are rspec for making unit tests less of a chore and devise for doing all of the authentication work for me. And I enjoy using Heroku since they're easy to scale and their CLI is very useful.

Web Development Experience

Chirpy

March 2022 | Tokyo

- Created an API that removes tweets if they are deemed too angry, sad, or fearful based off an IBM tone analyzer.
- Built an animated search bar solely out of CSS by using a cubic-bezier transition and changing width sizes.
- The search bar utilizes Stimulus by targeting the HTML that lists all the articles and replaces that HTML with only matched searched articles with no page reload needed.
- With the open-uri and nokogiri gems, Chirpy scrapes relevant articles connected to teenage life development and accumulates them onto a dedicated articles page.

2Bridal

February 2022 | Tokyo

- Created a marketplace app for renting out used designer wedding dresses.
- Implemented the Cloudinary API to store dress images.
- Created a JavaScript function that calculates and displays the cost of a dress depending on page elements, the price of a dress, and the duration of the rental period.

Yoshino Orthodontic

June 2021 | Tokyo

- Leveraged the power of WordPress and the Gutenberg editor tool to manipulate rows and columns and make the site fully responsive on all devices.
- Fine tuned the size of cards, boxes, and text to the pixel for a unified and clean look.

Education

Le Wagon Tokyo – Batch #718

Sep 2021 – Mar 2022 | Tokyo

Bachelor of Arts in Psychology, St. Joseph's College

2003 – 2008 | Brooklyn, NY, USA

Language

English (Native)
Japanese (Business | JLPT N2)
Spanish (Conversational)
